## COHORT DEFAULT RATE

The U.S. Department of Education (the Department) publishes cohort default rates based on the percentage of a school's borrowers who enter repayment on Direct Loan Program loans during a federal fiscal year (October 1–September 30) and default before the end of the second following fiscal year.

Rate Calculation: The denominator for the cohort default rate is the number of borrowers who entered repayment in the cohort fiscal year. The numerator for the cohort default rate is the number of borrowers who entered repayment in the current cohort fiscal year and the two preceding cohort fiscal years and who defaulted during the cohort fiscal years.

The most recent three-year Official Cohort Default rate for WyoTech is:

**ENROLLMENT NOTE:** To provide context for the Cohort Default Rate (CDR) data, we include Enrollment Figures (students enrolled at any time during the year) and the corresponding Percentage Calculation (borrowers entering repayment divided by that enrollment figure). There is no direct relationship between the timing of when a borrower entered repayment and any particular enrollment year; we have chosen to use the academic year ending on the 30th of June before the beginning of the cohort year.

Cohort Default Rate (CDR) data is not displayed when Number of Borrowers in Repayment (number of borrowers entering repayment in cohort) includes 10 or few borrowers.
